SUMMARY

Data Science Tech fresh graduate with a solid foundation in data science, data analysis, statistical analysis, and machine learning. Experienced in Python, SQL, R and data analysis tools such as Power BI, Excel, Tableau, and Looker Studio. Completed projects ranging from dashboard visualization, forecasting, as well as text (NLP) and spatial data analysis. Passionate about turning complex data into actionable insights, with strong analytical and problem-solving skills.

EDUCATION

UNIVERSITAS AIRLANGGA - Surabaya, Indonesia

September 2021 - July 2025

Bachelor of Data Science Technology - GPA 3.44

- Completed coursework and projects in data science, data analysis, machine learning, and statistical modeling using Python, R, SQL, Power BI, Excel, Tableau, Looker Studio, SPSS, Minitab, and GWR.
- Built and deployed models for time series forecasting (ARIMA, LSTM), NLP, churn prediction (Random Forest), survival analysis (Cox PH), and spatial data analysis (GWR) as well as analyzed and interpreted the results across academic and independent projects.
- Participated in the 24-Hour Data Science Hackathon 2024 (Bukit Vista) and Satria Data 2024 competition, demonstrating technical expertise, problem-solving, teamwork, and presentation skills.
- Achieved a Gold Medal (5th place) at the national Indonesia Bright Minds Competition (IBMC) 2025 for English proficiency at the university level.
- Thesis : *Implementation of Kalman Filter and LSTM Combination in Predicting The West Texas Intermediate (WTI) Crude Oil Prices.*

INTERNSHIP EXPERIENCE

Peruri (Percetakan Uang Republik Indonesia) - Karawang, Indonesia

November 2025 - Present

Maintenance Data Analyst (Machine Learning) Intern

- Built an NLP-based Information Retrieval (IR) system with Python as a decision support tool to accelerate corrective maintenance troubleshooting. Match machine failure complaints with the most relevant historical remedies using semantic similarity with a threshold of 80% similarity score.
- Designed a text preprocessing pipeline (regex cleaning, normalization, fixing wording inconsistency) and cleaned 14,892 maintenance log records using Python (regex, SQLAlchemy, scikit-learn, and SentenceTransformer) and SQL.
- Built machine maintenance report dashboards to analyze and report machine reliability KPIs (MTTR, MTBF, Availability, Reliability) and the failure occurrence of each machine component across multiple workcenters.
- Conducted a Failure Mode Classification utilizing PyTorch and Scikit's MLP with a Macro F1 Score of 81% and 84%
- Collaborated directly with machine technicians through regular progress discussions using a design thinking framework to ensure real-world applicability.

United Tractors Tbk - Jakarta, Indonesia

January 2024 - February 2024

Data Scientist Intern (PKL)

- Collaborated in a team of 2, conducted data analysis and forecasted the Newcastle coal prices using ARIMA and LSTM models, achieving MAPE scores of 8% and 6% respectively.
- Delivered forecasting insights to support data-driven business decision-making on price trends. Utilized Python (Pandas, NumPy, Matplotlib, tensorflow, yfinance), Power BI and Excel for data collecting, cleaning, processing, modeling, and visualization.
- Enhanced problem-solving, analytical thinking, teamwork, and communication skills through project collaboration and result presentation.

ORGANISATIONAL EXPERIENCES

Binary 3.0: Data Science Student Orientation Program - Surabaya, Indonesia
Fundraising & Consumption

August 2023 - September 2023

Managed event budgeting, vendor coordination, and logistics planning to support a successful student orientation program for Data Science freshmen. Collaborated with a cross-functional team to design and deliver a smooth event experience for participants. Created and summarized detailed budget reports using Excel, improving cost transparency and financial planning for the committee.

SKILLS

Technical: Python, R, Excel, SQL, Power BI, Tableau, Looker Data Studio, Minitab, SPSS, GeoDa, Pentaho, PowerPoint.

Soft Skills: Organizational Skills, Problem-Solving, Collaboration and Teamwork, Adaptability, Creativity, Analytical Thinking, Project Management and Planning, Design Thinking, Integrity, Continuous Learning, Attention to Detail, Presentation, Growth Mindset, Self-Efficacy, Fast Learning, Fast-Paced Environment, Communication, Professional and Academic English.

Areas of Expertise: Data Science, Data Analysis, Data Preprocessing, Statistical Data Analysis, Data Visualization, Data Mining, Image Mining, Text Mining, Natural Language Processing (NLP), Deep Learning, Databases, Dashboards & Reporting
